Below the principal behavioral constraints of the RESTsec abac meta-model are listed.

ABAC Concept	Nr.	Behavioral Constraint.
AuthorizationSubject	1	There must be exactly one *AuthorizationSubject* element.
AuthorizableResource	1	There can be no more *AuthorizableResource* elements than the number of *Resource* elements of the REST model.
	2	The set of available Attribute Categories for the Condition Attributes of any *ResourceAccessRule* of an *AuthorizableResource* element should include the `PARENT_RESOURCE` category if and only if the referenced REST model Resource element is *related resource* of another one.
	3	The set of available Attribute Categories for the Condition Attributes of any *ResourceAccessRule* of an *AuthorizableResource* element should include the `CHILD_RESOURCE` category if and only if the referenced REST model Resource element has at least one *related resource*.
ResourceAccessRule	1	The set of *AllowedAction* elements of a *ResourceAccessRule* may reference at most one `POST` *CRUDActivity*, at most one `GET` *CRUDActivity*, at most one `PUT` *CRUDActivity* and/or at most one `DELETE` *CRUDActivity* of the underlying REST model.
	2	The set of available Attribute Categories for the Condition Attributes of a *ResourceAccessRule* element should include the `INCLUDED_RESOURCE` category if and only if the *ResourceAccessRule* element has a `POST` and/or `PUT` *AllowedAction*.
Condition	1	The set of available Operators for a Condition should include the `GREATER_THAN`, `LESS_THAN`, `GREATER_THAN_OR_EQUAL`, `LESS_THAN_OR_EQUAL` Operators if and only if the left side operand Attribute is numerical and not a list.
	2	The set of available Operators for a Condition should include the SUBSET, NOT_SUBSET, SET_CONTAINS, SET_NOT_CONTAINS Operators if and only if the left side operand Attribute is a list.
